Zamzam Fashion

API Documentation Plan

47 endpoints · 15 sections · v1.2 · 5 November 2026

1. Identity & Auth APIs 4

1	POST	/api/auth/login	Authenticates the owner and sets the auth cookie
2	POST	/api/auth/logout	Signs the user out and clears the cookie
3	GET	/api/auth/me	Returns the signed-in user
4	POST	/api/auth/change-password	Changes the current user's password and clears mustChangePassword

2. Storefront Catalog APIs 4

5	GET	/api/categories	Returns the visible category tree, sorted by sortOrder
6	GET	/api/products	Paged product list with filters, search and sorting
7	GET	/api/products/{slug}	Product page: gallery, description and every variant with its price and stock
8	GET	/api/site-settings	Editable home page content: announcement bar, hero, new collection, contacts and social links

3. Checkout & Order Tracking APIs 3

9	GET	/api/delivery-zones	Lists the active governorates with their delivery fee and delivery time
10	POST	/api/orders	Places a ready-made order
11	GET	/api/orders/{number}	Public order tracking page data

4. Tailoring (Made-to-Measure) APIs 5

12	GET	/api/tailoring/catalog	Returns the styles, garment types, fabrics, fits and measurement fields used by the request form
13	POST	/api/tailoring/estimate	Instant price estimate from the price rules while the customer fills in the form
14	POST	/api/tailoring/requests	Submits a tailoring request with an optional reference photo
15	POST	/api/orders/{number}/quote/approve	The customer accepts the price adjusted by the owner from the secure link
16	POST	/api/orders/{number}/quote/reject	The customer declines the quote

5. Admin · Category APIs 4

17	GET	/api/admin/categories	Full tree including hidden categories, with productCount on each one
18	POST	/api/admin/categories	Creates a main category or a sub-category
19	PUT	/api/admin/categories/{id}	Updates a category, including its parent and menu order (same body as POST)
20	DELETE	/api/admin/categories/{id}	Deletes an empty category

6. Admin · Product APIs 5

21	GET	/api/admin/products	Paged product table for the dashboard
22	GET	/api/admin/products/{id}	Full product for the edit form, with the real stock and version of every variant
23	POST	/api/admin/products	Creates a product, optionally with its first variants
24	PUT	/api/admin/products/{id}	Updates the product fields, including show/hide (isVisible)
25	DELETE	/api/admin/products/{id}	Deletes a product

7. Admin · Variant APIs 3

26	POST	/api/admin/products/{id}/variants	Adds a size/color combination to a product
27	PUT	/api/admin/variants/{id}	Updates size, color, stock or price
28	DELETE	/api/admin/variants/{id}	Removes a variant (a soft delete if it was ever ordered)

8. Admin · Product Image APIs 2

29	POST	/api/admin/products/{id}/images	Uploads a product photo
30	DELETE	/api/admin/images/{id}	Deletes an image and its stored files

9. Admin · Color APIs 4

31	GET	/api/admin/colors	Lists colors with usageCount
32	POST	/api/admin/colors	Adds a color
33	PUT	/api/admin/colors/{id}	Updates a color
34	DELETE	/api/admin/colors/{id}	Deletes an unused color

10. Admin · Order APIs 4

35	GET	/api/admin/orders	Paged order board with filters
36	GET	/api/admin/orders/{id}	Full order: unmasked customer data, lines, tailoring spec with a 10-minute signed photo URL, and the full status history with who made each change
37	POST	/api/admin/orders/{id}/status	Moves the order to the next status
38	POST	/api/admin/orders/{id}/quote	Confirms or adjusts the estimated price of a Custom order

11. Admin · Tailoring Catalog APIs 2

39	GET	/api/admin/tailoring/catalog	Full catalog, including inactive items
40	PUT	/api/admin/tailoring/catalog	Replaces the whole catalog

12. Admin · Delivery Zone APIs 2

41	GET	/api/admin/delivery-zones	All 27 governorates, including inactive ones
42	PUT	/api/admin/delivery-zones	Bulk update of fees, delivery time and active flag

13. Admin · Site Settings APIs 2

43	GET	/api/admin/site-settings	Current settings for the edit form
44	PUT	/api/admin/site-settings	Saves home page content, contacts and social links

14. Admin · Price Rules APIs 2

45	GET	/api/admin/tailoring/pricing	Current price rules: base price per style, fabric extras, lining, size and extra options
46	PUT	/api/admin/tailoring/pricing	Saves the price rules

15. Admin · Dashboard API 1

47	GET	/api/admin/dashboard	Home screen numbers for the admin panel

Future (Phase 2) — not built now

- AI tools: design preview image, size helper, style assistant chat, owner assistant
- Online payments (Paymob) and courier integration (Bosta)
- Employee accounts (Staff role) — the role system is already in place
- Audit log of who changed what (useful once employees join), printable packing slips
